NEW ORLEANS.

MILL MACHINERY.

Agricultural Implements. All Implements and Machinery POR USE OF Plantation, Saw or Grist Mill, We are prepared to supply, promptly and on

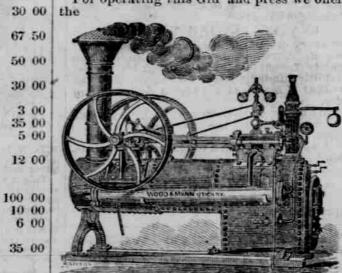

THE GULLET STEEL BRUSH COTTOV GIN.

These celebrated Cotton Gins are again manufactured by the patentee, Mr. B. D. Gullet, formerly of Aberdeen, Miss. Besides many improvements in the ordinary details of Gins, they have an extra carding brush and a steel brush. These combine to clean the cotton of all motes and dust and deliver it in the lint room, combed to its full length and consequently entirely free from all nap. These results cause cotton ginned on the "Steel brush Gin" to grade higher than the same cotton from any other Gin, and the advanced price obtained from a crop of say 50 bales would pay the entire cost of the Gin. During the past season cotton from the same fields and picked at the same time, part ginned by the steel brush and part by other gins has been sold at 2½ cents in favor of the steel brush. Af-ter incurring the heavy expense which now attends the raising of cotton it is all important that it should be prepared for market in the best possible manner. This can be effected by using the

STEEL BRUSH GIN. We are sole General Agents for the southwest and have constantly on hand all sizes from 40 to 80 saws. Descriptive circulars mailed on application. Merchants securing orders for these Gins or any other of the items embraced in our list will be allowed a proper commission.

COTTON PRESSES, We are manufacturing for the crop of 1867. an improvement on the Bullock press which 55 00 will meet all the requirements of cotton packing. It can be worked by hand, horse 15 00 or steam power. Can be used out doors or in a building, is rapid in its working, of immense power, and makes a bale of exactly the proper size.

For operating this Gin and press we offer

WOOD & MANN Portable Steam Engines,

These engines have been long tried and ver found in every particular adapted to the wants of plant tion and neighborhood work. Having two fly wheels and length of shaft sufficient to add other pullies, ne or two cotton gins, a corn mill and cotton press can all be worked from one engine and at no other expense than first cost of engine, no extra shafting being needed. A 6 Horse power is ample where it is desired to run one gin of 60 or so saws a con mill and cotton press

Larger sizes 15 to 30 horse power we furnish to drive saw mills or large corn and flouring mills. STATIONARY ENGINES, 12 00 AND BOILERS, SHAFTING 20 00

BELTING, IRON TIES, BAGGING AND ROPE, &c. Circular Saw Mills. KINGSLAND & FERGUSON'S

with improved simultaneous and independent screw head block. All o, with plain screw head block. These mills are heavy, strong and made for wear. Mesars Kingsland and Ferguson have during the past year greatly improved these mills to suit this market. Cu long experience in the s le and erection of saw mill machinery enable us to specify just what is needed in a mill adapted to the heavy timber of the south west and in this mill as ow furnished

all the requisites are combined
We also furnish lighter mills when de ired.
